Handwriting Paper for Spacing between Words
**Description and Logic**

Many students have difficulty leaving spaces between words while writing. This paper provides a visual reminder to students to leave adequate space between words. To accommodate students with varying handwriting size, in this package you will find pages with varying space available for writing. Additionally, once a student grows accustomed to leaving space between words, he/she can graduate to spacing papers with faint (as opposed to dark) visual reminder. By varying the sharpness of visual cue, one can carefully transition a student to regular writing paper.
