Goodwill Industries of Greater Grand Rapids in conjunction with Grand Valley State University and Michigan Rehabilitation Services developed a program to assist youth on the ASD spectrum between the ages of 18-26 with life and employment skills.

In the LITE Program (Learning Independence through Experience), individuals are provided opportunities to learn the expectations of common workplace environments. Participants receive training in social skills and interactions, explore career options, and participate in paid work experiences at Grand Valley State University or Goodwill. Following the work experience, job placement, job coaching and retention services are all provided to assist those desiring long-term employment.
